Target version:			

Description

This is the group of users which can upload documents to the library.
Being a part of this group does not grant any extra permissions aside from being able to upload documents. Once the user uploads or creates a new version of a document, the specific user will be assigned as Creator of the file and will have all the permissions available to that role.

History

#1 - 08/12/2025 11:15 AM - Malith Batugedara

- Status changed from New to In Progress

#2 - 08/14/2025 09:55 AM - Malith Batugedara

Some permissions for document creators, such as file uploads, should be set up.

#3 - 08/15/2025 04:22 AM - Malith Batugedara

In Edit Properties, the document name cannot be changed. We need to check and compare the permissions of the 'BPO' and 'Document Creators' groups, and review the permissions assigned to the 'Document Creators' group

#4 - 08/19/2025 11:17 AM - Malith Batugedara

We need to confirm what access the Documents Creators group should have.

#5 - 08/25/2025 08:45 AM - Malith Batugedara

Adding users with the requirements to create documents in each department.

#6 - 09/04/2025 09:21 AM - Andres Galavis

Rashan is a document creator at the moment and Isuru will be added too.
We need to test this feature with them.

#7 - 09/17/2025 06:02 AM - Malith Batugedara

- Status changed from In Progress to Resolved
